

Setup GooseVPN for KODI (console mode)

1. Login in <https://portal.goosevpn.com/download.php> and get your token:

2. Get server name from <https://portal.goosevpn.com/servers.php>

	Netherlands 2, Amsterdam (P2P)	nl-10
	Netherlands 3, Amsterdam (No P2P)	nl-5
	Netherlands 4, Amsterdam (No P2P)	nl-6

3. Use ssh connect to you KODI and get autoseup script

```
wget https://portal.goosevpn.com/downloads/kodi/autoseup.sh  
chmod +x autoseup.sh
```

4. Run autoseup.sh with short server name, username and token

```
./autoseup.sh nl-10 "client@email.com" 769b10d9767462cf876a5cdd567c72385661479f
```

5. Please check on screen: IP address before should be different after connection.
